

HOW TO REPLACE THE MOTOR ON A SHADE WITH A HOUSING BOX WITH CABLE GUIDES

- Remove set screws from bottom bar. Slide eyelets out and remove bottom bar from fabric pocket.
- Remove front cover from box by removing 1 hood screw from each side.
- Remove cradle idler bolt from non-operation side.
- Remove Motor Spring clip from Motor side.
- Disconnect motor wire from power before you remove roll shade.
- Remove Roller Tube with fabric including motor wire. 2-person job, pull roller shade out from idler end and slip off motor end.
- Place roller tube with fabric on sawhorses.
- Slide motor out of roller tube.
- Remove crown and drive from old motor and place on replacement motor.
- Reinsert Roller shade while working motor wire back into place.
- re-install idler bolt and motor spring clip.
- Reinstall bottom bar and add eyelets with set screws.
- Follow programing instructions to program new motor.
- Re-install front cover to complete.
