

Baby Grande/Grande 2022 Roller tube -XQ with blue Tube Adapters

Parts needed for installing motor correctly into roller tube.

Roller Tube

Drive (L) & Crown (R) (both Blue)

Motor

1st Step

Slide Crown onto motor as shown.

Slide all the way on to match notch on blue crown to motor. It must slip all the way on.

2nd Step

Install the motor drive on the end of the motor.

Slide on until white clip engages drive securely.

3rd Step – slide motor into roller tube.

Drive end goes in 1st, must match notches correctly for it to slide in.

Slide in until both motor crown and drive are fully inserted into the roller tube. Then install the 4 screws to secure the motor crown on to roller tube.

Motor must be fully inserted into crown as shown.

Refer to your installation instructions on how to install roller tube into housing unit or exposed brackets.
